# About us

Adelaide Fretwork design and manufacture a comprehensive of fretwork. Since inception over 18 years ago, the company has helped both heritage home owners and builders around Australia restore homes to the period or add character to a new home through the use of decorative fretwork.

It's our belief that heritage homes appear "naked" without decorative fretwork.

Our extensive range of designs includes fretwork gables, brackets, motifs, screen doors, window canopies, exterior and interior friezes, room dividers, hall arches and internal grilles.

Importantly, we can custom manufacture to your exact specifications and recreate any design your require, including hard to find heritage pieces.

Adelaide Fretwork prefer and recommend the use of Western Red Cedar or external grade plywood – timbers which can withstand the elements over decades when treated correctly.

Sophisticated CNC machinery and hand operated fretsaws are used to manufacture our products. We can provide rapid response to your orders and consistent quality is assured.

The team at Adelaide Fretwork look forward to receiving your enquiry and helping you with your project.

## Exterior Fretwork

Adelaide Fretwork can supply or design exterior fretwork that complements both new and heritage homes.

For existing homes, we can supply authentic fretwork that's true to the period or custom-create to specification.

Exterior fretwork includes:

- » gables
- » inserts
- » brackets
- » motifs
- » screen doors
- » window canopies
- » exterior friezes.
